

Home Fire Safety Checklist

“Cover the Bases & Strike Out Fire” is more than a bunch of fire safety dos and don’ts. This year’s campaign works to get people actively involved in home fire prevention and preparedness.

The home fire safety checklist (on the next two pages) plays the lead role in FPW 2001, motivating everyone to step up to the plate, and to proactively seek out and eliminate potential cooking, heating, and electrical hazards from their homes.

Simply clip along the dotted lines of the home safety checklist and make as many copies as you need. Pass them out at schools visits, open houses, safety fairs, and any other events at which you’d like to distribute interactive materials.

Encourage kids and families to do a home fire safety inspection by offering local incentives or prizes to everyone who brings a completed checklist to your fire station or to FPW events you’re holding. (As you’ll see, there’s extra room on the back side of the checklist to add instructions on where residents in your area can bring their completed form.)

Home Fire Safety Checklist

Score a fire safety home run — do a home fire safety inspection!

Striking out fire in your home requires a little homework. Take about 20 minutes to inspect your home. As you go from room to room, answer the questions below. For each question you answer “yes” to, give yourself a point. When you’re finished, add up the points to find out your score. **Kids, ask a grown-up to help you complete this checklist!**

First Base - Cooking Safety

Yes No Does a grown-up always stay in the kitchen when food is cooking on the stove?

Yes No Are stove tops and counters clean and uncluttered?

Yes No Are there pot holders within easy reach of the stove?

Yes No Are pot handles turned inward so they can't be bumped?

Yes No Are curtains and other things that can burn well away from the stove?

Yes No Is there a “kid-free” zone of three feet (one metre) around the stove when grown-ups are cooking?

Second Base - Heating Safety

Yes No Are portable space heaters always turned off when adults leave the room or go to sleep?

Yes No If space heaters are used in your home, are they at least three feet (one metre) away from anything else that can burn, including people, furniture, and pets?

Yes No Does your fireplace have a sturdy screen to catch sparks?

Yes No Has your chimney been inspected and cleaned during the past year?

Yes No Has your furnace been serviced by a professional in the past year?

Yes No Are propane tanks and other fuels stored outside your home?

Third Base - Electrical Safety

Yes No Are extension cords used safely? (Are they not under carpets or across doorways?)

Yes No Are electrical cords in good condition, without cracks or frayed areas? (A grown-up should unplug lamps and appliances before inspecting the cords.)

Yes No Are kitchen appliances – such as the coffee-maker, toaster oven, and microwave – plugged into separate receptacle outlets?

Home Plate - Smoke Alarms/ Home Fire Escape

Yes No Does your home have working smoke alarms on every floor and inside or near all sleeping areas?

Yes No Are the batteries working in all your smoke alarms? (A grown-up should help by pushing the test button to find out.)

Yes No Are all the exits in your home clear of furniture, toys, and clutter?

Yes No Does your family have a home fire escape plan that includes two exits, usually a door and a window, from each room?

- Yes No Has your family picked a safe place to meet outside after you exit your home?
- Yes No Have you and your family practiced a home fire drill within the last six months? (Why not do one tonight?)
- Yes No Do you know the fire department's emergency phone number (which should be called from a neighbor's or nearby phone once you get outside)?

What's Your Fire Safety Batting Average?

If you answered "yes" to all of the checklist questions above, congratulations! You scored a fire safety home run!

If you answered "yes" to 15 to 20 questions, you've made it to third base. Just make a few adjustments, and you'll easily hit a fire safety home run.

If you answered "yes" to 10 to 14 questions, you've hit a double. You're going in the right direction, but you've got some work to do before you get to home plate.

If you answered "yes" to fewer than 10 questions, you've reached first base, but you need to make many changes around your home in order to reach home plate.

For all questions to which you answered "no," make sure your family takes the steps needed to make them a "yes" so you can all score a fire safety home run!
